

GDC Memorial College, Bahal (Bhiwani)

NAAC Accredited Grade 'B'

Department of Psychology

Course Outcomes, Programme Outcomes and Programme Specific Outcomes

B.A. (Psychology) 1st Sem.

Subject: Introduction to Psychology
(Theory and Practical)

Subject Code: PSY-01

Course Outcomes (CO)

After completion of the successful course, the student is expected to:

CO1: Understanding the historical development and approaches to study psychology and how it is a science.

CO2: Understanding the nature and theories of emotions and the basic needs, drives and incentives along with biological and social motives

CO3: Understanding the nature and approaches to study personality and intelligence along with the theories to explain these

CO4: Understanding the methods of psychology experimental, observation and survey method

CO5: Eysenck Personality Questionnaire-Revised: Introduction to personality, nature of personality, Eysenck theory of personality, administration of test, formulation and discussion of results. Study of emotions: Introduction to emotions, nature of emotions, theories of emotions, administration of test, formulation and discussion of results. Simple Reaction Time: Introduction of reaction time, types of reaction time, factors determining the reaction time, administration of test, formulation and discussion of results

CO6: Observation test of speed and accuracy: Introduction to observation, types of observation, process of observation, use of observation in research and general, administration of test, formulation and discussion of results. Raven's Progressive Matrices: Introduction and nature of intelligence, determinants of intelligence, theories of intelligence, measurement of intelligence, administration of test, formulation and discussion of results. Verbal test of Intelligence: Introduction of intelligence, nature of intelligence, factors determining intelligence, theories of intelligence, measurement of intelligence, administration of test, formulation and discussion of results

Programme Outcomes (PO)

After completion of these courses students will able to:

PO1: Have a good knowledge and clarity of concepts related to the subjects chosen by the students.

PO2: Ability to apply the acquired knowledge to solve problems in the relevant field.

PO3: Have a developed critical and analytical sense.

PO4: Acquire vocabulary and writing skills appropriate to the subject.

PO5: Have a wider mental horizon and better self confidence.

Programme Specific Outcomes (PSO)

After completion of these courses students will able to:

PSO1: Understand the nature, fields and uses of psychological skills in general and professional life.

PSO2: Understand the human behavior on the bases of different schools of psychology

PSO3: Evaluate behavior objectively with the help of scientific tools like psychological tests, inventories, questionnaires and experimentations.

PSO4: Understanding of social and ethical issues in psychological testing and experimentations.

PSO5: Enables to understand the underlying causes of abnormal behavioral patterns and therapies to rectify them.

PSO6: Analysis of physiological correlates of behavioral patterns like emotion, memory, learning and many more.

PSO7: Self-understanding to become a well -adjusted citizen with lots of career opportunities.

B.A. (Psychology) 2nd Sem.

Subject: Experimental Psychology
(Theory and Practical)

Subject Code: PSY-02

Course Outcomes (CO)

After completion of the successful course, the student is expected to:

CO1: Understanding the nature characteristics and types of attention

CO2: Understanding the problems of psychophysics and classical method of psychophysics.

CO3: Understanding the definition and factors affecting learning an trial and error learning and classical and operant conditioning

CO4: Understanding the definition stages and method to study memory and factors leading to forgetting and pneumonias.

CO5: Understanding the stages of problem solving and convergent and divergent thinking.

CO6: Understanding the statistics frequency distribution and graphical representation of data and calculating measures of central tendency.

Programme Outcomes (PO)

After completion of these courses students will able to:

PO1: Have a good knowledge and clarity of concepts related to the subjects chosen by the students.

PO2: Ability to apply the acquired knowledge to solve problems in the relevant field.

PO3: Have a developed critical and analytical sense.

PO4: Acquire vocabulary and writing skills appropriate to the subject.

PO5: Have a wider mental horizon and better self confidence.

Programme Specific Outcomes (PSO)

After completion of these courses students will able to:

PSO1: Understand the nature, fields and uses of psychological skills in general and professional life.

PSO2: Understand the human behavior on the bases of different schools of psychology

PSO3: Evaluate behavior objectively with the help of scientific tools like psychological tests, inventories, questionnaires and experimentations.

PSO4: Understanding of social and ethical issues in psychological testing and experimentations.

PSO5: Enables to understand the underlying causes of abnormal behavioral patterns and therapies to rectify them.

PSO6: Analysis of physiological correlates of behavioral patterns like emotion, memory, learning and many more.

PSO7: Self-understanding to become a well -adjusted citizen with lots of career opportunities.

B.A. (Psychology) 3rd Sem.

Subject: Social Psychology
(Theory and Practical)

Subject Code: PSY-03

Course Outcomes (CO)

After completion of the successful course, the student is expected to:

CO1: Nature and subject matter of social Psychology: Apply the Psychology Knowledge in Social Situations and the Study the Various Fields of social psychology works

CO2: Sociometric Method: The Study of interrelationship Conflicts, helping etc in social situations

CO3: Development of Socialization: The study shows the importance of family characteristics for the development of social skills in children with physical Disabilities

CO4: Individual team work: Function effectively as an individual, and as a member of leader in diverse teams, and in multidisciplinary settings

CO5: Attitude and Prejudice: The group categories upon which these negative attitudes are based can be wide ranging, including categories such as race, social, class, gender, religion, sexuality, and ability.

CO6: Prosocial behavior –Such as helping, Sharif, donating, co-operating and volunteering. Student's motivation for learning and contributions to the classroom. Poster traits that are beneficial for children

CO7: Aggression –In students, frustration due to blocked goals can cause aggression determinants and prevention

CO8: Understanding the nature and development of prejudice.

CO9: Understanding the nature and development of stereotypes.

CO10: Understand the theories of leadership and characteristics and formation

Programme Outcomes (PO)

After completion of these courses students will able to:

PO1: Have a good knowledge and clarity of concepts related to the subjects chosen by the students.

PO2: Ability to apply the acquired knowledge to solve problems in the relevant field.

PO3: Have a developed critical and analytical sense.

PO4: Acquire vocabulary and writing skills appropriate to the subject.

PO5: Have a wider mental horizon and better self confidence.

Programme Specific Outcomes (PSO)

After completion of these courses students will able to:

PSO1: Understand the nature, fields and uses of psychological skills in general and professional life.

PSO2: Understand the human behavior on the bases of different schools of psychology

PSO3: Evaluate behavior objectively with the help of scientific tools like psychological tests, inventories, questionnaires and experimentations.

PSO4: Understanding of social and ethical issues in psychological testing and experimentations.

PSO5: Enables to understand the underlying causes of abnormal behavioral patterns and therapies to rectify them.

PSO6: Analysis of physiological correlates of behavioral patterns like emotion, memory, learning and many more.

PSO7: Self-understanding to become a well -adjusted citizen with lots of career opportunities.

B.A. (Psychology) 3rd Sem.

Subject: Developmental Psychology
(Theory and Practical)

Subject Code: PSY-04

Course Outcomes (CO)

After completion of the successful course, the student is expected to:

CO1: HUMAN DEVELOPMENT –Psychology, education, or a medical field, some background knowledge of how people grow and change throughout life is essential.

CO2: Human Development Biological, social, cultural –The field of human development covers the entire life span and has benefitted explore the psychological, social, cultural, biological development of people from conception to old age.

CO4: Motor, emotional, Cognitive development –Understanding the basis unit of motor, emotional, and cognitive development and how it is developed.

CO5: Adulthood –Understanding the nature and aging changing patterns of problems in early adulthood and late adulthood.

Programme Outcomes (PO)

After completion of these courses students will able to:

PO1: Have a good knowledge and clarity of concepts related to the subjects chosen by the students.

PO2: Ability to apply the acquired knowledge to solve problems in the relevant field.

PO3: Have a developed critical and analytical sense.

PO4: Acquire vocabulary and writing skills appropriate to the subject.

PO5: Have a wider mental horizon and better self confidence.

Programme Specific Outcomes (PSO)

After completion of these courses students will able to:

PSO1: Understand the nature, fields and uses of psychological skills in general and professional life.

PSO2: Understand the human behavior on the bases of different schools of psychology

PSO3: Evaluate behavior objectively with the help of scientific tools like psychological tests, inventories, questionnaires and experimentations.

PSO4: Understanding of social and ethical issues in psychological testing and experimentations.

PSO5: Enables to understand the underlying causes of abnormal behavioral patterns and therapies to rectify them.

PSO6: Analysis of physiological correlates of behavioral patterns like emotion, memory, learning and many more.

PSO7: Self-understanding to become a well -adjusted citizen with lots of career opportunities.

B.A. (Psychology) 3rd Sem.

Subject: Psychopathology

Subject Code: PSY-05

Course Outcomes (CO)

After completion of the successful course, the student is expected to:

CO1: Psychopathology –Understanding its meaning and nature of psychological disorders (e.g.) depression, phobias, and obsessive compulsive disorder, including biological, psychological, and social explanations. Classification of psychopathology, its needs and DSM classification.

CO2: Diagnostic assessment i.e. case history, interview, projective techniques. Biological, Psychodynamic, Behavioral, cognitive –The many different models used to explain the nature and treatment illness compound the problems of defining and classifying abnormal behavior

CO3: Models –Understanding the various models to study psychopathology namely anxiety disorder, generalized anxiety disorder, phobic disorder, Obsessive compulsive disorder etc.

CO4: Mood Disorders and schizophrenia –Understanding the various models to study psychopathology namely mood disorders and schizophrenia.

Programme Outcomes (PO)

After completion of these courses students will able to:

PO1: Have a good knowledge and clarity of concepts related to the subjects chosen by the students.

PO2: Ability to apply the acquired knowledge to solve problems in the relevant field.

PO3: Have a developed critical and analytical sense.

PO4: Acquire vocabulary and writing skills appropriate to the subject.

PO5: Have a wider mental horizon and better self confidence.

Programme Specific Outcomes (PSO)

After completion of these courses students will able to:

PSO1: Understand the nature, fields and uses of psychological skills in general and professional life.

PSO2: Understand the human behavior on the bases of different schools of psychology

PSO3: Evaluate behavior objectively with the help of scientific tools like psychological tests, inventories, questionnaires and experimentations.

PSO4: Understanding of social and ethical issues in psychological testing and experimentations.

PSO5: Enables to understand the underlying causes of abnormal behavioral patterns and therapies to rectify them.

PSO6: Analysis of physiological correlates of behavioral patterns like emotion, memory, learning and many more.

PSO7: Self-understanding to become a well -adjusted citizen with lots of career opportunities.

B.A. (Psychology) 3rd Sem.

Subject: Applied Psychology

Subject Code: PSY-06

Course Outcomes (CO)

After completion of the successful course, the student is expected to:

CO1: Applied psychology: Understanding the meaning, history , fields along with the careers in psychology. Organizational psychology its objectives, scope, development.

CO2: Guidance: Understanding the objectives, principle and types of guidance along with organization of guidance program. Counseling: Understanding the needs, principles, special areas along with the types of counseling.

CO3: Health psychology: Understanding the meaning, scope, objectives along with the concept of health and illness. Understanding the psychological factors in physical illness, life style and health along with the stress and coping.

CO4: Forensic psychology: Understanding the psychology and law, eyewitness memory along with the accuracy and improvement of eyewitness memory. Statistics: meaning of correlation , rank difference and product moment method.

CO5: Testing the adjustment of the testee with the help of Adjustment Inventory for college students. Testing the health of the testee with help of PGI health questionnaire. Testing the life style of the testee with the help of Life Style Scale.

CO6: Testing the level of stress of the employee with the help of Occupational stress index. Testing the satisfaction level of the employee with the help of Job satisfaction scale. Testing whether the testee has a need for counseling or not either the help of Psychological counseling needs scale

Programme Outcomes (PO)

After completion of these courses students will able to:

PO1: Have a good knowledge and clarity of concepts related to the subjects chosen by the students.

PO2: Ability to apply the acquired knowledge to solve problems in the relevant field.

PO3: Have a developed critical and analytical sense.

PO4: Acquire vocabulary and writing skills appropriate to the subject.

PO5: Have a wider mental horizon and better self confidence.

Programme Specific Outcomes (PSO)

After completion of these courses students will able to:

PSO1: Understand the nature, fields and uses of psychological skills in general and professional life.

PSO2: Understand the human behavior on the bases of different schools of psychology

PSO3: Evaluate behavior objectively with the help of scientific tools like psychological tests, inventories, questionnaires and experimentations.

PSO4: Understanding of social and ethical issues in psychological testing and experimentations.

PSO5: Enables to understand the underlying causes of abnormal behavioral patterns and therapies to rectify them.

PSO6: Analysis of physiological correlates of behavioral patterns like emotion, memory, learning and many more.

PSO7: Self-understanding to become a well -adjusted citizen with lots of career opportunities.

Credits -6 theory periods and 2 practical periods of 45 minutes each per week over the semester.
